

## DRY FIX STANDARD RIDGE KITS

**PRODUCT:** Dry Fix Standard Ridge Kit

**DESCRIPTION:** Dry fix ridge systems involve covering the roof batten with a breathable ridge roll. Our ridge roll is manufactured in-house from a polypropylene hydrophobic mesh that allows the roof to breathe whilst repelling water. A pumped butyl self-adhesive strip then allows for a secure adhesion to the tile or slate. One by one, the ridge tiles are then installed over the ventilation ridge roll to secure it in place and are laid across the apex of the roof using plastic unions, ratchet clips, screws and nails.

### FEATURES & BENEFITS:

- Mechanically fixed eliminating the requirement of mortar
- Simple to install and requires no special tools
- Resistant to wind and water
- 20 year guarantee on all components
- All major components manufactured in our Lancashire production facility

**INSTALLATION:** See Dry Fix Standard Ridge Kit Installation Guide

### BRITISH STANDARDS:

- Conforms to BS 5534: Code of Practice for Slating & Tiling For Pitched Roofs & Vertical Tiling
- Conforms to BS 8612: Dry Fixed Ridge, Hip & Verges Systems for Slating & Tiling
- Conforms to BS 5250: For Roofspace Ventilation (Management and Moisture in Buildings)

### COMPATIBLE WITH:

- Concrete ridge tiles (EASYRIDGEBLK)
- Half round and angled ridge tiles
- Hips - a Hip Kit must be used in conjunction with the Dry Fix Standard Ridge Kit

### FOR USE ON:

- Ridge
- Hip
- New build and refurbishments

### MATERIAL:

Ridge Roll - Polypropylene hydrophobic mesh, corrugated aluminium and pumped butyl self-adhesive strip  
 Batten Straps - stainless steel  
 Unions - film grade polypropylene  
 Ratchet clips - glass filled nylon

**ROOF PITCH:** Suitable for pitches of 15° to 45°

**VENTILATION:** Provides 5mm of continuous ridge ventilation

### INSTALLATION

**TEMPERATURE:** 5° to 35°
