

PRODUCT DATA SHEET

EVERBUILD® P11 SYSTEM CLEANSER

POWERFUL, HEAVY DUTY CLEANING AGENT FOR OLD AND NEW CENTRAL HEATING SYSTEMS.

PRODUCT DESCRIPTION

EVERBUILD® P11 SYSTEM CLEANSER will remove commissioning and flux residues from new systems and restore circulation to old systems which suffer from sludge. EVERBUILD® P11 SYSTEM CLEANSER should also be used when components are replaced or existing systems are extended.

USES

- New and existing central heating systems.
- Extensions to existing systems.
- Remedial cleansing when components are replaced.

CHARACTERISTICS / ADVANTAGES

- Compatible with plastic tanks, micro bore and all metals (including aluminium) used in central heating systems.
- Economical – 1ltr will treat a 100ltr system capacity.
- Enhances heating efficiency.
- Removes sludge, scale and corrosion.
- Eradicates corrosive black oxide and flux residues.

PRODUCT INFORMATION

Packaging	1Ltr Jerry Can
Colour	Brown
Shelf Life	36 months in original unopened containers.
Storage Conditions	Store in original container away from frost in a dry area between 5 and 30°C.

APPLICATION INSTRUCTIONS

APPLICATION METHOD / TOOLS

Use EVERBUILD® P11 SYSTEM CLEANSER cleanser in accordance with BS7593:1996

1. Turn off boiler, mains water and drain down.
2. Locate the central heating feed and expansion tank.
3. Shake the bottle and pour the entire contents into the tank.
4. Turn on mains, refill the system and restart the boiler pump. Bleed all radiators.
5. Circulate under normal operation for :

Fast Cleanse (New components) - **2 Hours (HOT)**

New System - **2 Weeks**

Previously treated - **3 weeks**

Old system - **4 weeks**

After the recommended period, repeat from step 1 but add P14 system inhibitor at step 3 then continue with step 4 which completed the operation.

Alternatively EVERBUILD® P11 SYSTEM CLEANSER can be added via a partially drained radiator. It is still necessary to drain and refill after the recommended period in step 5.

LIMITATIONS

- Use only as directed.
- Only suitable for fully indirect systems.
- Not suitable for use in PRIMATIC single feed cylinders.
- Use in conjunction with P14 system inhibitor for on-going protection after the flush.

VALUE BASE

All technical data stated in this Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

LOCAL RESTRICTIONS

Note that as a result of specific local regulations the declared data and recommended uses for this product may vary from country to country. Consult the local Product Data Sheet for the exact product data and uses.

ECOLOGY, HEALTH AND SAFETY

Consult COSHH data sheet for full list of hazards.

LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
