

TURBO SET

90

Compact, powerful, high performing and provides hobbyists with professional welding, particularly suitable for hydraulic, air conditioning, and refrigeration work. Product safety is guaranteed by 4 dual-protection flashback arrestor valves positioned inside the torch body, on the reducer and on the tap. Wide range of standard accessories

ATTENTION TO DETAIL

Very lightweight kit. Its practical handle and cylinder locking device ensure transportability anywhere. These details make it a useful welding kit for refrigerator technicians, goldsmiths and demanding hobbyists.
