DuPont™ Tyvek® Supro

**Choosing the right
breather membrane is
as easy as 1, 2, 3...**

Tyvek.

Performance beyond protection

DuPont™ Tyvek® Supro

When considering your breather membrane, ask these 3 simple questions:

1- Do I need to vent my roof?

No, Tyvek® Supro does not need any soffit, tile or ridge ventilation, therefore saving time and money

2- Do I need an airspace between the insulation and breather membrane?

Because the Tyvek® Supro membrane breathes, it does not need an airspace.

3- Does the product have the necessary approvals?

Tyvek® Supro is fully BBA and IAB approved, suitable for use in all types of pitched roofs.

All breather membranes are not the same!

Choose the market leader Tyvek® Supro, the reference point in breather membranes.

Installation couldn't be simpler

Tyvek® Supro can be installed:

- horizontally or vertically
- draped over the rafters (like IF felt) or under counter-battens
- laid in direct contact with the Insulation
- without the need for ANY roof ventilation accessories

**Traditional ventilation
(with HR underlay)**

Airtight and vapour open
